YARNS AND FABRICS

The quality of the yarns and fabrics is the foundation of the Company's approach to delivering the highest quality garments.

Continental Clothing Co. controls the spinning process of almost seventy percent of all the yarns used in production as part of its vertically-integrated manufacturing structure, with the remainder being carefully sourced externally. All the yarns used by the Company are fully combed and ring spun.

All the fabrics are knitted at our in-house facilities, and dyed with GOTS approved chemicals, using low-water and controlled waste discharge processes, certified to OekoTex 100 Class I standard and conforming to REACH.

Organic certified fabrics are dyed in our zero-discharge dyehouse, where all the water is recycled in a closed-loop system.

FILS ET TISSUS

La qualité des fils et tissus est la fondation de l'approche de l'entreprise pour fournir des vêtements grande qualité.

L'entreprise Continental Clothing, a une structure de confection verticalement intégrée et contrôle ainsi le filage de près de 70% des fils utilisés dans la production. Le reste des fils est soigneusement sélectionné. Tous les fils utilisés par l'entreprise sont intégralement peignés et pré-rétrécis.

Tous les tissus sont tissés dans nos locaux et teints avec des produits chimiques approuvés par GOTS, utilisant un procédé faible en eau et s'assurant de la gestion des déchets, certifiés sous la norme OekoTex 100 Class I et conformément à REACH.

Les tissus certifiés biologiques sont teints dans notre teinturerie sans aucun rejet de déchets. L'eau utilisée est recyclée via un système de boucle fermée.

FILATI E TESSUTI

La qualità dei filati e tessuti è il fondamento nella strategia della Società per fornire capi di altissima qualità.

Continental Clothing Co. controlla il processo di filatura di quasi il 70% di tutti i filati utilizzati nella produzione come parte della sua struttura produttiva integrata verticalmente mentre il resto dei materiali provenienti dall'esterno è attentamente verificato. Tutti i filati utilizzati dalla Società sono completamente pettinati e filati ad anello.

Tutti i tessuti sono realizzati nei nostri impianti "in-house" e tinti secondo gli standard chimici approvati dal GOTS, con basso utilizzo di acqua e processi di scarico rifiuti controllati. Il nostro certificato OekoTex 100 Classe I livello e conforme al protocollo REACH.

I tessuti certificati biologici sono tinti nella nostra tintoria a zero scarico, in cui tutta l'acqua viene riciclata in un sistema a circuito chiuso.

HILOS Y TELAS

La calidad de nuestras telas e hilos es el fundamento de nuestro propósito por hacer prendas de gran calidad.

Continental Clothing Co. controla el proceso de spinning de casi el 70% de nuestros hilos utilizados en la producción como parte de su estructura de proceso verticalmente integrada, sin olvidarnos de la obtención externa. Todos los hilos que usamos son enteramente peinados y de hilado de anillo.

Todas las telas están tejidas en nuestras instalaciones y teñidas con químicos aprobados por la GOTS, utilizando procesos controlados de descarga de desperdicio y bajo nivel de agua, certificado por OekoTex 100 Class I standard y conforme a REACH.

Telas orgánicas certificadas son teñidas en nuestras tintorerías de cero-descarga, donde el agua es reciclada en un sistema de circuito cerrado.

CARBON FOOTPRINT REDUCTION

The carbon footprint (CO₂e) is the total carbon dioxide, methane, nitrous oxide, and other greenhouse gases emitted during the cultivation and harvesting of cotton, fibre processing, textile production, packaging, transportation and warehousing.

In January 2008, Continental Clothing Co. became the first company in the world to calculate the carbon footprint and place the Carbon Reduction Label on textile products.

We have reduced the carbon footprint of EarthPositive® products by around 90% through a combination of innovative product design, low impact organic agriculture, efficiency in manufacturing, and by replacing standard grid electricity with renewable wind power. We do not use carbon offsets and our footprint calculations are certified by the Carbon Trust Certifications in the U.K.

It has been calculated that a single EarthPositive® T-shirt saves around 7 kilograms of CO₂e, whereas a hooded sweatshirt saves up to 28 kgs.

Having taken the greenhouse gas emissions to pre-industrial levels, all the EarthPositive® products carry the registered mark "Climate Neutral".

REDUCTION DE L'EMPREINTE CARBONE

L'empreinte carbone (CO₂e) est le total du dioxyde de carbone, méthane, protoxyde d'azote et des autres gaz à effet de serre émis lors de la culture, de la récolte du coton, du traitement des fibres, de la production du textile, de l'emballage, du transport et de la mise en entrepôt.

En janvier 2008, Continental Clothing devient la première entreprise du monde à calculer l'empreinte carbone et à apposer l'étiquette de la Réduction d'Empreinte Carbone (Carbon Reduction Label) sur des produits textiles.

Nous avons réduit l'empreinte carbone des produits EarthPositive® d'environ 90% grâce à la combinaison d'un produit au design innovant, d'un faible impact environnemental lié à une production biologique, de l'efficacité dans la confection et en remplaçant le réseau d'électricité classique par de l'énergie renouvelable provenant d'éoliennes. Nous n'utilisons aucune compensation carbone et le calcul de l'empreinte carbone est certifié par le Carbon Trust Certifications au Royaume-Uni.

Il a été calculé qu'un seul t-shirt EarthPositive® réduit les émissions de CO₂e d'environ 7kg, et un sweat à capuche en économise jusqu'à 28kg.

En ayant réduit les émissions de gaz à effet de serre à un niveau pré-industriel, tous les produits EarthPositive® portent la marque enregistrée de "Climate Neutral" (climatiquement neutre).

RIDUZIONE IMPRONTA CARBONIO

L'impronta di carbonio (CO₂e) è il totale di anidride carbonica, metano, protossido di azoto e altri gas serra emessi durante la coltivazione e la raccolta del cotone, lavorazione delle fibre, la produzione tessile, imballaggio, trasporto e magazzinaggio.

Nel gennaio 2008, Continental Clothing Co. è stata la prima azienda al mondo a calcolare l'impronta di carbonio e ad inserire l'etichetta di riduzione dell'impronta carbonio (Carbon Reduction Label) su prodotti tessili.

Abbiamo ridotto l'impronta di carbonio dei prodotti EarthPositive® di circa il 90% attraverso una combinazione di design innovativo, agricoltura biologica, efficienza nella produzione e sostituendo la rete elettrica tradizionale con energia eolica rinnovabile. Non usiamo crediti per la compensazioni di carbonio ed i nostri calcoli dell'impronta sono certificati dal Carbon Trust Certification nel Regno Unito.

E' stato calcolato che una singola T-shirt EarthPositive® fa risparmiare circa 7 kg di CO₂e, mentre una felpa con cappuccio ne fa risparmiare fino a 28 kg.

Avendo riportato l'emissione dei gas serra ad un livello pre-industriale, tutti i prodotti EarthPositive® portano il marchio registrato "Climate Neutral".

REDUCCIÓN DE LA HUELLA DE CARBONO

La huella de carbono (CO₂e) es el total de dióxido de carbono, metano, óxido nítrico y otros gases de efecto invernadero emitidos durante el cultivo del algodón, proceso de la fibra, producción del textil, empaquetado, transporte y almacenamiento.

En Enero 2008, Continental Clothing Co. se convirtió en la primera empresa del mundo en calcular la huella de carbono y colocar la etiqueta de reducción de carbono en sus prendas.

Hemos reducido esta huella de carbono en un 90% en la colección EarthPositive® a través de una combinación de un diseño de producto innovador, agricultura orgánica de bajo impacto, eficiencia en la manufacturación y reemplazando energía eléctrica por energías renovables eólicas. No usamos compensación de carbono y los cálculos de la huella de carbono están certificados por la Carbon Trust Certifications en Reino Unido.

Se ha hecho el cálculo sobre una camiseta de EarthPositive® ahorra unos 7 kilogramos de CO₂e, mientras que una sudadera ahorra unos 28 kgs.

Habiendo llevado los gases de efecto invernadero a niveles pre-industriales, todos los productos de EarthPositive® llevan consigo la marca "Climate Neutral".

PRINTING SUITABILITY

All our products are designed and manufactured specifically for garment decorating, and, with the exception of un-dyed bags, are suitable for all screen-printing techniques and all ink types, including discharge printing.

Because of the high quality surface finish, our garments perform particularly well with digital direct-to-garment (DTG) printing.

We strongly urge the use of ink types and printing processes with a low environmental impact, without phthalates or aromatic solvents, non-PVC, water-based, compliant with environmental and organic standards.

The new Continental® Sublimation T-shirt, made from 100% recycled polyester, is designed especially for sublimation transfer printing.

TECHNIQUES D'IMPRESSION POSSIBLES

Tous nos produits sont conçus et confectionnés dans l'optique d'être décorés et peuvent être imprimés en utilisant tous types d'encre, y compris l'impression rongeant - à l'exception de nos sacs non teints.

La grande qualité de la surface de nos vêtements est tout particulièrement adaptée à l'impression numérique directe sur textile (DTG).

Nous recommandons fortement l'utilisation d'encre et de procédés d'impression avec un faible impact sur l'environnement, sans phtalates ou solvants aromatiques, sans PVC, à base d'eau et conforme aux normes environnementales.

Le nouveau Continental® Sublimation T-shirt est fabriqué avec 100% de polyester recyclé, conçu spécialement pour l'impression par sublimation.

IDONEITÀ ALLA STAMPA

Grazie all'alta qualità dei tessuti, la superficie di tutti i nostri capi è particolarmente adatta per la stampa digitale diretta (DTG).

Chiediamo con forza l'uso di inchiostri e di processi di stampa a basso impatto ambientale. Senza ftalati, solventi aromatici, PVC, inchiostri a base d'acqua, compatibili con gli standard ambientali e biologici.

La nuova Continental® Sublimation T-shirt realizzata in 100% in poliestere riciclato è stata progettata appositamente per la stampa in sublimazione.

IDONEIDAD DE IMPRESIÓN

Todos nuestros productos están diseñados y manufacturados específicamente para la decoración de prendas y, con la excepción de bolsas no teñidas, están adaptadas para toda técnica de impresión incluyendo descarga.

Gracias a la gran calidad y acabado de la superficie, nuestras prendas funcionan bastante bien en particular con la impresión digital directa (DTG).

Instamos el uso de tintas y procesos de impresión que causen un bajo impacto al medio ambiente, sin solventes aromáticos y ftálatos, no-PVC, base de agua, que sean respetuosos con el medio ambiente y normas orgánicas.

La nueva Continental® Sublimation T-shirt hecha de poliéster 100% reciclado está diseñada especialmente para la impresión con sublimación.

REFORMED

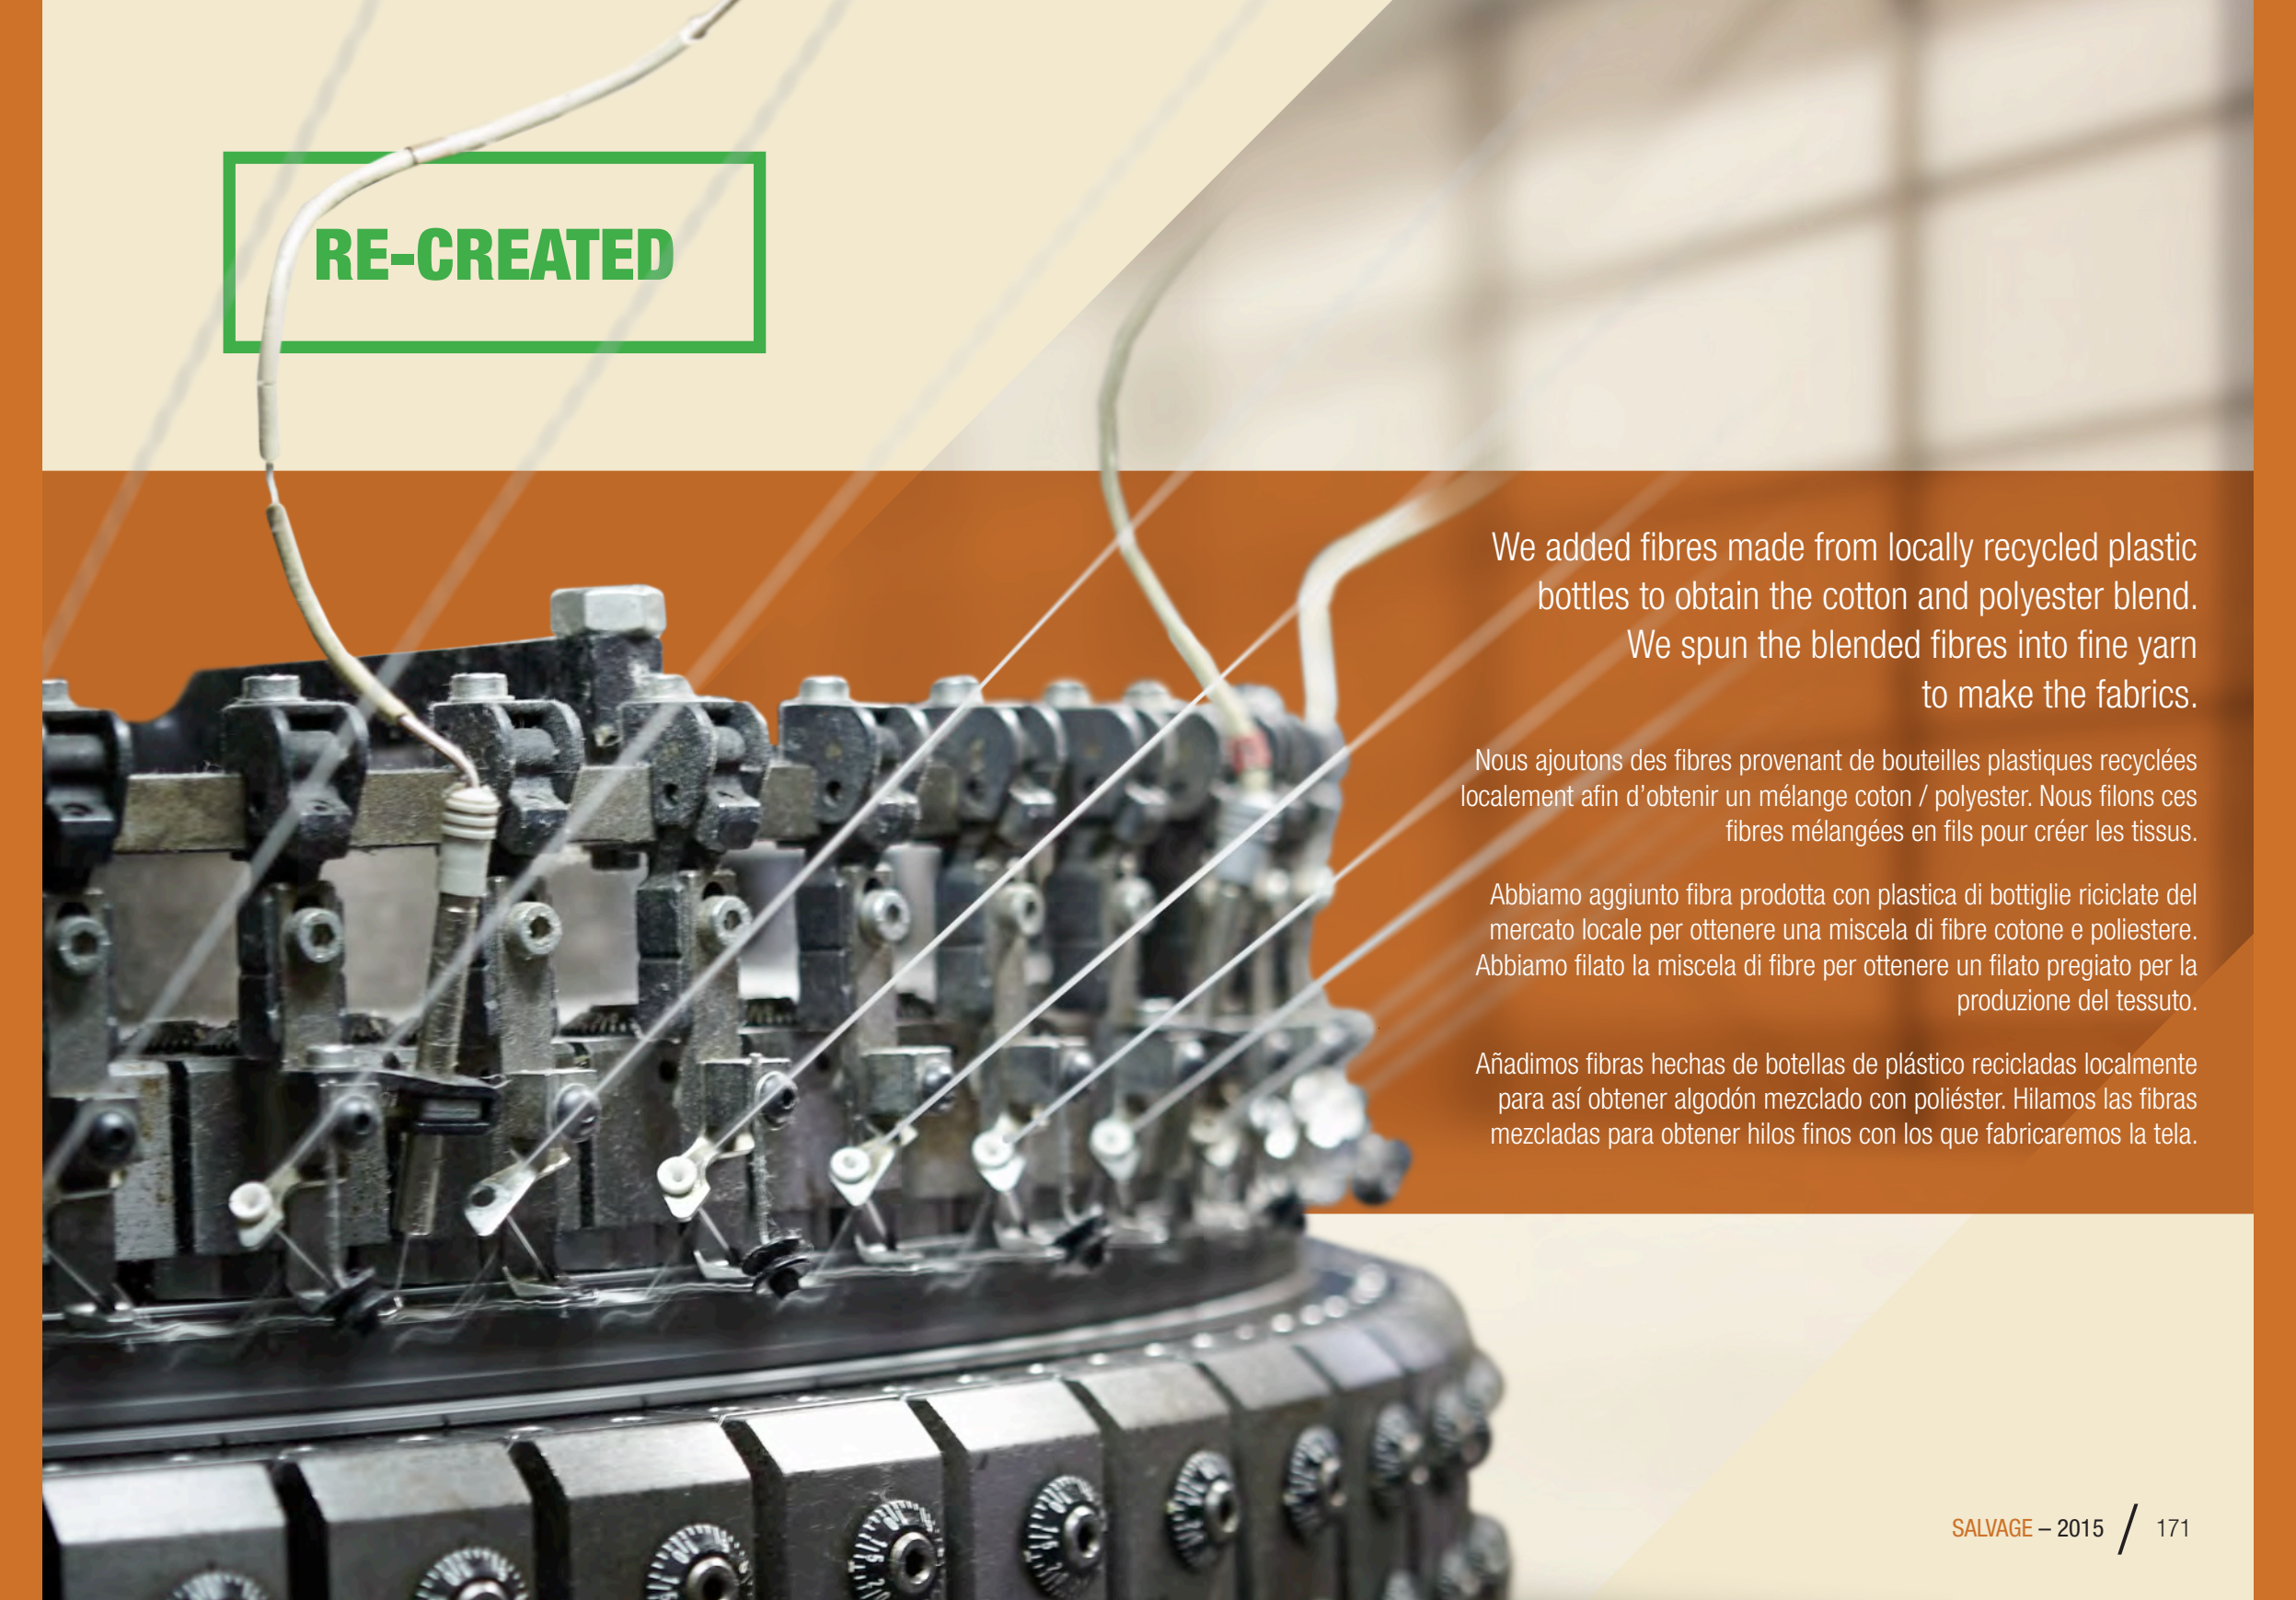

We salvaged the cuttings from organic cotton textile production, shredded them and turned them back into soft cotton fibres.

Nous récupérons les chutes de la production de coton biologique, les déchiquetons et les transformons en douces fibres de coton.

Abbiamo salvato gli scarti di cotone organico della produzione tessile, triturati e ritrasformati in soffice fibra di cotone.

Recuperamos los cortes de la producción textil de algodón orgánico, los trituramos y convertimos de nuevo en suaves fibras de algodón.

RE-CREATED

We added fibres made from locally recycled plastic bottles to obtain the cotton and polyester blend.
We spun the blended fibres into fine yarn to make the fabrics.

Nous ajoutons des fibres provenant de bouteilles plastiques recyclées localement afin d'obtenir un mélange coton / polyester. Nous filons ces fibres mélangées en fils pour créer les tissus.

Abbiamo aggiunto fibra prodotta con plastica di bottiglie riciclate del mercato locale per ottenere una miscela di fibre cotone e poliestere. Abbiamo filato la miscela di fibre per ottenere un filato pregiato per la produzione del tessuto.

Añadimos fibras hechas de botellas de plástico recicladas localmente para así obtener algodón mezclado con poliéster. Hilamos las fibras mezcladas para obtener hilos finos con los que fabricaremos la tela.
